EPIC FAIL

InBloom venne fondata nel 2011, lanciata nel 2013 e chiusa nel 2014.

Vennero investiti 100 milioni di dollari (in larga parte provenienti dalla Bill & Melinda Gates Foundation) con impiego di risorse tecniche e supporto dagli organi di governo per creare una piattaforma centralizzata per gestire e condividere dati, programmi e curricula degli studenti.

LESSONS LEARNED (?)

In seguito vennero introdotte 400 nuove disposizioni legislative nei diversi Stati USA

Sono stati introdotte figure professionali equivalenti al Data Protection Officer negli enti preposti

E' stato costituito un ente dedicato: lo Student Data Privacy Consortium (SDPC) che promuove la «tactical privacy»

Consortium Goals

Establish a **community of stakeholders** who have various needs addressed through policy, technology and/or effective practice sharing around effective privacy management.

1

Development of **tools and resources** to address operational issues not currently being addressed

2

Development of a **clearinghouse of student data privacy operational issues** and resources to support schools, districts, states and vendors in managing those issues – no matter where the resources originate.

3

Identify **projects that have on-the-ground and real-world impact** on student data privacy enabling schools, districts, state and vendors find resources, adapt them to their unique context and implement needed protections

4

Leverage partnership organizations working in the privacy space to have their good work utilized and no reinvention of existing work
